OCCUPATIONAL HEALTH, SAFETY AND ENVIRONMENT POLICY

TİTAN2 IC İÇTAŞ İNŞAAT ANONİM ŞİRKETİ, a joint Russian-Turkish venture established to implement the Akkuyu NPP construction acting as the general contractor for capital construction and nuclear facilities, design management and supply of materials and equipment, realizes the high importance of occupational health and safety of its own employees and personnel of contractors, as well as of the environmental safety.

TİTAN2 IC İÇTAŞ İNŞAAT ANONİM ŞİRKETİ recognizes and declares the priority of employees' life and health over production activity results.

The company undertakes to create safe working conditions, protection of life, health and environment as per the regulations of the laws of the Republic of Turkey and international standards.

TİTAN2 IC İÇTAŞ İNŞAAT ANONİM ŞİRKETİ **goals in the occupational health, industrial safety and environmental protection are as follows:**

- no accidents and injuries at work;
- no incidents or emergencies;
- identification of all hazardous production factors and control of all industrial risks;
- continuous improvement of occupational health, safety and environment management system;
- minimize the adverse impact on the environment and prevent the unsustainable use of natural resources.

In order to achieve the set goals, TİTAN2 IC İÇTAŞ İNŞAAT ANONİM ŞİRKETİ undertakes:

- To ensure implementation of the activities, including the activities of suppliers and sub-suppliers engaged in the works at the TITAN 2 IC İCTAS İNSAAT ANONİM SİRKETİ facilities, in accordance with the legal and other regulatory requirements of the Republic of Turkey, the requirements of Rosatom State Atomic Energy Corporation, the Customer, non-governmental organizations, as well as international standards ISO 14001:2015, ISO 45001:2018 and its own requirements applicable to the activities of TİTAN2 IC İÇTAŞ İNŞAAT ANONİM ŞİRKETİ.
- To ensure effective functioning and continuous improvement of occupational health, safety and environment management system;
- To assess environmental, occupational health and safety risks, create safe working conditions to protect employees' lives and health, prevent work-related injuries and diseases;
- To hold monitoring, inspections, and internal audits to control compliance with legal and other requirements applicable to environmental, health and safety risks;
- To increase continuously the level of expertise and competence of employees in terms of safe working practices;
- To provide advice and staff involvement in managing situations that may affect safety;
- To use natural resources and energy efficiently, introduce low-waste technologies, safe accumulation, storage and disposal technologies of production and consumption waste, and other technologies aimed at reducing the adverse environmental impact;
- To envisage the required organizational, financial, human, material and technical resources to implement this Policy.
